

THE BLUEPRINT™

The Complete Leadership Infrastructure System

WELCOME · PHASE 1 — FOUNDATIONS
PHASE 2 — PLANNING · PHASE 3 — OPERATING SYSTEMS · PHASE 4 — PRESERVATION

INFRASTRUCTURE IS NOT A METAPHOR. IT IS THE WORK.

INTELLECTUAL PROPERTY LICENSE & TERMS OF USE

© 2026 The Co.LLab™ Building Leadership Infrastructure™. All Rights Reserved.

1. THE CO.LLAB IP™

The Co.LLab IP™ refers collectively to the original intellectual property created and developed for The Co.LLab™ Building Leadership Infrastructure™, including The .LLab™ product line and all associated frameworks, methodologies, models, systems, tools, templates, assessments, content, terminology, designs, processes, and materials. The Co.LLab IP™ is proprietary intellectual property created and controlled by The Co.LLab™ and its owner.

2. LICENSE TO USE

Purchase of The Co.LLab IP™ grants the user a limited, non-exclusive, non-transferable, non-sublicensable license to use the applicable IP to build, develop, strengthen, and sustain leadership infrastructure within the user's own organization. This is a right of use only — it does not transfer ownership, authorship, copyright, or trademark rights.

3. WORKING COPIES

The user is expressly authorized to create and maintain working copies — digital, printed, or otherwise — solely for authorized personal or organizational use, and may complete, annotate, and customize those copies for their own needs.

4. AUTHORIZED USE

The Co.LLab IP™ may be applied to leadership development, organizational planning, strategy, implementation, and related activities. Users retain ownership of their own original work product; the underlying frameworks remain proprietary to The Co.LLab™.

5. RESTRICTIONS

- Claim ownership or authorship of The Co.LLab IP™
- Sell, license, sublicense, distribute, or provide it to an unauthorized third party
- Repackage or present it as your own proprietary framework or product
- Commercialize it or create a competing product substantially based upon it
- Remove or alter proprietary, copyright, or trademark notices

6 – 7. COLLABORATION & RESERVATION OF RIGHTS

External, public, commercial, or third-party use requires prior written authorization from The Co.LLab™. All rights not expressly granted are reserved by the intellectual-property owner. No purchase or use of The Co.LLab IP™ constitutes a transfer of ownership.

THE CO.LLAB IP™ REMAINS PROPRIETARY TO THE CO.LLAB™ AND ITS OWNER.
THE USER RECEIVES A LICENSE TO USE IT — NOT OWNERSHIP OF IT.

INSIDE THIS EDITION

TABLE OF CONTENTS

00 **WELCOME** — *The foundation of The Co.LLab — mission, vision & the architecture of leadership*

01 **PHASE 1 — FOUNDATIONS** — *Structural grounding & leadership identity*

02 **PHASE 2 — INFRASTRUCTURE PLANNING** — *Load mapping, accountability & capacity*

03 **PHASE 3 — INTERNAL OPERATING SYSTEMS** — *Communication, decision architecture & culture*

04 **PHASE 4 — PRESERVATION** — *Succession, resilience & sustaining what's built*

BEFORE YOU BEGIN

YOU ARE THE ARCHITECT.

Every lasting structure begins with someone willing to draw the plans before the first beam is set. That's the role you're stepping into now — not a passenger in your organization's story, but the person responsible for its bones.

This book is your blueprint. Four phases, in order, the way a building rises: *foundation, framework, systems, then the work of making it last.* Skip a phase and you build on sand. Follow it, and you build something that doesn't depend on you being in the room to stand.

That's the real subject of this book. Not management. Not productivity. *Legacy* — what remains standing after you've handed off the keys.

FOUNDATION → FRAMEWORK → SYSTEMS → PRESERVATION

00 / WELCOME

WELCOME TO THE .LLAB™

Leadership is infrastructure. Not personality. Not title. Not hierarchy. This is where the Architect breaks ground.

Infrastructure determines whether an organization stands, scales, or fractures. Every organization already has leadership infrastructure — the question is whether it was designed, or whether it formed by default.

OUR MISSION

The Co.LLab: Building Leadership Infrastructure™ empowers organizations to transform potential into performance by building leadership infrastructure that drives results, culture, and sustainable growth. We provide the frameworks, tools, and guidance necessary to strengthen the internal operations of businesses — clarifying decision-making, aligning strategy with culture, and embedding accountability into everyday execution.

OUR VISION

We envision a world where every company thrives through strong, ethical, and people-centered leadership. We believe businesses succeed not through luck or charisma, but through clarity, accountability, and well-designed systems that outlast the founder.

> THE .LLAB MEMBERSHIP™ IS BUILT FOR
>
> CEOs, founders, executives, and high-capacity leaders who understand that growth exposes structural weaknesses — and that leadership must be intentionally engineered.

LEADERSHIP IS STRUCTURAL

In any organization, every person influences outcomes. Every decision affects alignment. Every behavior reinforces or erodes culture. Every role carries weight.

If leadership is infrastructure, then every individual is a structural component of that infrastructure.

LOAD-BEARING ROLES

- Frontline employees carry execution load
- Managers stabilize communication and accountability
- Senior leaders connect systems across functions
- Executives define direction and protect structural integrity

THE CORE TRUTH

Some components are load-bearing. Some connect systems. Some reinforce culture. Some absorb pressure. But every piece matters.

An organization does not fail because one leader underperforms — it fractures when the infrastructure is misaligned.

Waste no more time arguing what a good man should be. Be one.

— MARCUS AURELIUS, PHILOSOPHER

THE ARCHITECT: THE ROLE OF THE EXECUTIVE LEADER

While leadership is distributed, infrastructure requires architectural oversight. In every enduring structure, there is an Architect — in an organization, that Architect is often the CEO, founder, or executive leadership team.

THE ARCHITECT

- Defines the vision
- Establishes structural standards
- Protects alignment to mission
- Identifies stress points before fracture
- Reinforces the system as it scales

The Architect does not micromanage each component. The Architect ensures coherence — that systems align with strategy, roles align with accountability, culture aligns with vision, and growth aligns with capacity.

> REMEMBER
> When the Architect abdicates design responsibility, infrastructure forms by default. When the Architect designs intentionally, growth becomes sustainable.

OUR ROLE: THE STRUCTURAL DESIGN AUTHORITY

If the executive leader is the Architect, and every team member is structural, what is The Co.LLab? We are the Structural Design Authority. We do not replace leadership — we design the systems that allow leadership to scale.

WE PROVIDE

- Blueprint methodology
- Structural leadership frameworks
- Decision architecture
- Operating system design
- Reinforcement and preservation protocols

> **THE TRANSLATION**
> Where the Architect holds the vision, The Co.LLab engineers the structure that sustains it. We translate leadership into infrastructure.

GUIDING PRINCIPLES™

Four principles anchor The .LLab Membership™ and define structural integrity.

01

ALWAYS UPHOLD THE MISSION & VISION™

Every system and process exists to advance the organization's mission. Alignment is essential — purpose guides every action and decision.

02

TRUST YOUR TEAM™

Empowered leaders give their teams clear expectations and the freedom to grow. Strong relationships make both the easy and hard conversations possible.

03

TRUST YOURSELF™

Leaders must make confident decisions in service of the vision. Trusting your judgment creates clarity for your team and momentum for the organization.

04

ENJOY THE JOURNEY™

Infrastructure and growth take time. Resilient leaders embrace challenges as opportunities to strengthen systems — built through patience, reflection, and consistency.

It's the little things citizens do. That's what will make the difference.

— WANGARI MAATHAI, SCHOLAR & NOBEL LAUREATE

THE 4 PHASES OF BUILDING LEADERSHIP INFRASTRUCTURE™

The development of effective leadership is a structured, intentional process that moves through four key phases.

01

FOUNDATIONS

Establishes clarity and stability — grounding leaders in mission, vision, values, and cultural commitments.

02

INFRASTRUCTURE PLANNING & MANAGEMENT

Translates the foundation into designed systems — defining roles, accountability, and performance structures.

03

INTERNAL OPERATING SYSTEMS

Ensures systems function consistently — embedding reliable communication, decision-making, and performance rhythms.

04

PRESERVATION

Sustains leaders and infrastructure over time — resilience-building, succession planning, and cultural reinforcement.

LET'S BUILD

Sustainable organizations are built by leaders who understand infrastructure — from the CEO to the frontline. When every leader understands their structural responsibility, organizations scale with strength, clarity, and cohesion.

01 / FOUNDATIONS

PHASE ONE

Structural grounding & leadership identity. Every legacy needs a foundation strong enough to hold what gets built on top of it.

FIG. 01 — FOUNDATION CROSS-SECTION

WHAT HOLDS THE STRUCTURE UP

Without foundation, leadership becomes reactive.

With foundation, it becomes anchored — the first floor of the Architect's legacy.

EXECUTIVE FRAMING & OVERVIEW

Leadership infrastructure begins with a strong foundation. Every decision, interaction, and behavior either reinforces or destabilizes the system. In this phase, you establish clarity on your role as the Architect of leadership — and as a structural component within your organization.

WHY THIS MATTERS

- Growth without structure creates chaos
- Strong infrastructure ensures alignment, efficiency, and culture reinforcement
- Leadership is not only positional — every team member is load-bearing in the system

KEY OUTCOMES

- Define your personal leadership architecture
- Understand the structural impact of all roles, including your own
- Begin building a mission-aligned blueprint for leadership infrastructure

GUIDING PRINCIPLES™ INTEGRATION

Always Uphold Mission & Vision™ · Trust Your Team™ · Trust Yourself™ · Enjoy the Journey™ — every activity in this phase is anchored to these four principles.

CORE CONCEPT 01 — MISSION ANCHORING™

MISSION ALIGNMENT ASSESSMENT™

Leadership infrastructure exists to support purpose. Misalignment in mission creates cracks that compromise decisions, culture, and growth. Leaders must actively align every action with the organization's mission.

1 List your top five organizational priorities.

2 Evaluate each priority against the Mission statement.

3 Identify where current processes, behaviors, or culture are misaligned.

4 Document at least three opportunities to improve alignment.

REFLECTION

How do my daily decisions reinforce or weaken the organizational mission?

Where have I allowed misalignment to persist?

How can I engage my team to close these gaps?

“

No man will make a great leader who wants to do it all himself.

— ANDREW CARNEGIE, PHILANTHROPIST

CORE CONCEPT 02 — VISION INTEGRITY™

VISION MAPPING EXERCISE™

Vision is the blueprint of the organization; infrastructure ensures it is executed. Leaders must proactively design structures that enable the vision rather than relying solely on influence or authority.

1 Create a 3-year vision map for your organization.

2 Identify gaps where current systems, capabilities, or resources may prevent execution.

3 List five strategic interventions to reinforce alignment.

4 Connect each intervention to a Guiding Principle™.

REFLECTION

Where does current infrastructure support or hinder execution of the vision?

Which interventions will have the highest structural impact?

CORE CONCEPTS 03 & 04

STANDARDS & DISTRIBUTED LEADERSHIP

Ethical, behavioral, and performance standards are the load-bearing beams of culture. Without clear standards, infrastructure weakens — and every team member contributes to that infrastructure, whether or not it's named.

LEADERSHIP STANDARDS CHARTER™

1 Draft 5–7 behaviors or values that anchor culture and performance.

STRUCTURAL INFLUENCE MAP™

2 List direct reports and key collaborators — note load-bearing responsibilities, cultural influence, and role in decision-making for each.

3 Highlight redundancies, gaps, or potential overloads.

> REFLECTION
>
> *Who is underutilized in the infrastructure? Where do structural weaknesses exist?*

APPLIED ASSIGNMENT & DELIVERABLE

YOUR PERSONAL LEADERSHIP INFRASTRUCTURE BLUEPRINT™

Draft Version 1 of your blueprint — the working document that carries forward into every phase that follows.

1 Key decision domains

2 Cultural anchors

3 Load-bearing responsibilities

4 Stress points and mitigation strategies

EXECUTIVE INTEGRATION

Recognize your dual role as Architect and structural component. Use this blueprint to reinforce alignment and guide the phases ahead.

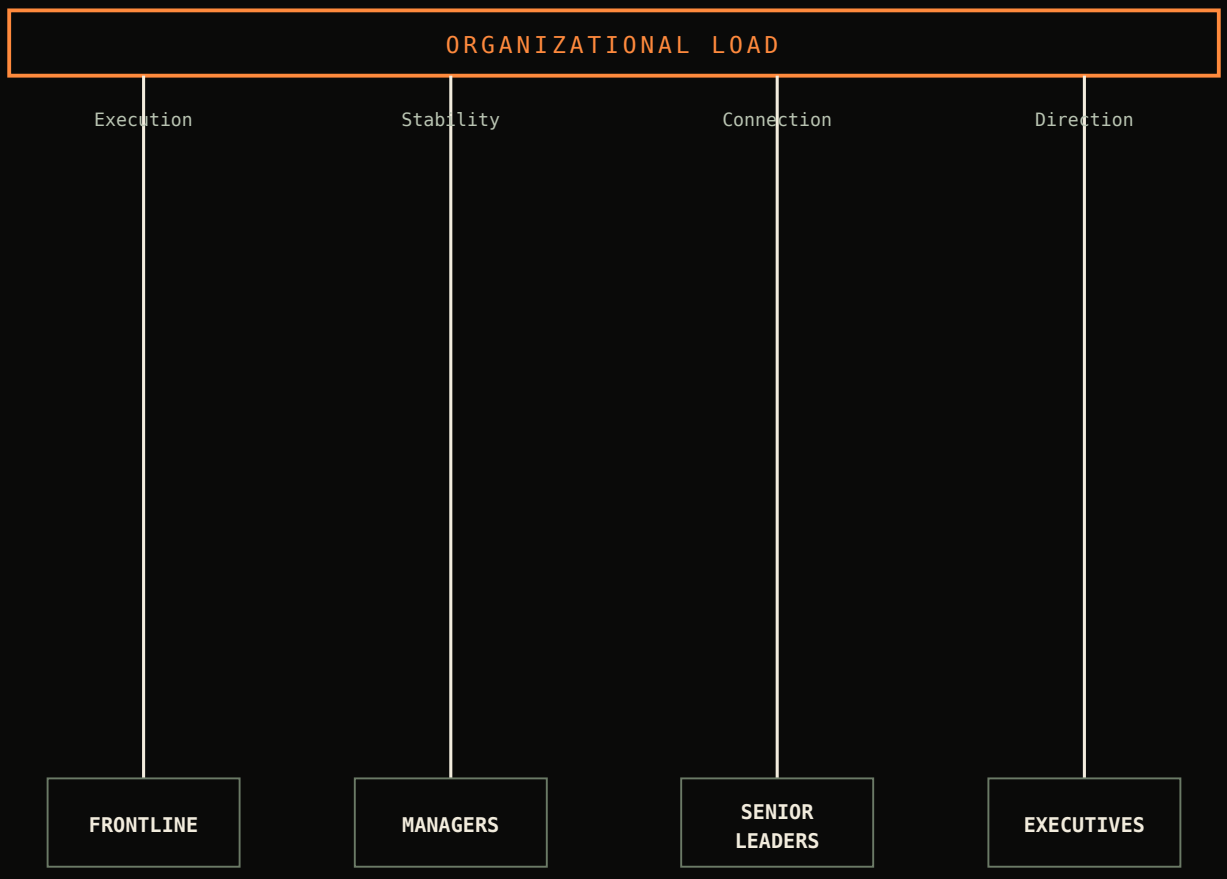

02 / INFRASTRUCTURE PLANNING

PHASE TWO

Design precedes scale. The Architect drafts the framework now so the structure can grow without cracking later.

FIG. 02 — LOAD DISTRIBUTION

WHO CARRIES WHAT WEIGHT

Every column bears real weight. Map the load before it finds the weakest column on its own — that's how structures fail.

INFRASTRUCTURE PLANNING BLUEPRINT™

Consolidates load mapping, accountability assignments, and capacity planning into a single actionable framework — ensuring operational efficiency, clarity of responsibility, and scalability of resources across the organization.

WHAT THIS PHASE BUILDS

- Strategic priority mapping
- Role clarity
- Accountability structures
- Delegation systems
- Performance architecture

THE FOUR WORKING PARTS

- Load Mapping — where the weight actually sits
- Accountability Mapping — who owns what, and who escalates to whom
- Capacity Planning — sustainable workload vs. actual workload
- Integrated Action Plan — turning the map into next steps

> **GUIDING PRINCIPLE**
> Trust Your Team™ — this phase only works when it's built with the people who carry the load, not just about them.

01 — LOAD MAPPING

WHERE THE WEIGHT SITS

Identify organizational tasks, processes, and responsibilities to understand workload distribution and system demands.

1 Document all major tasks and processes, including who is responsible for each.

2 Note frequency, priority, and estimated time required for completion.

3 Highlight high-load areas that may create bottlenecks — and identify roles or teams under excessive pressure.

4 Use this information to plan task reallocation or additional support.

REFLECTION

Where is the organization one absence away from a bottleneck?

It does not matter how slowly you go, as long as you do not stop.

— CONFUCIUS, PHILOSOPHER

02 — ACCOUNTABILITY MAPPING

OWNERSHIP, OVERSIGHT & ESCALATION

Clarify ownership, oversight, and escalation for all tasks and processes — documentation reduces ambiguity, and ambiguity is where accountability quietly dies.

1 Assign a primary owner for each critical task.

2 Identify accountable parties responsible for oversight and validation.

3 Establish escalation paths for unresolved issues or exceptions.

REFLECTION

Where does ownership currently live only in someone's head — not on paper?

03 — CAPACITY PLANNING

SUSTAINABLE VS. ACTUAL LOAD

Assess team and resource capacity to ensure sustainable workloads and operational efficiency.

1 Estimate current capacity and compare it with actual workloads.

2 Identify overextended roles or teams — and underutilized capacity.

3 Recommend actions: training, hiring, or workflow adjustments to balance workloads.

REFLECTION

If your best person left tomorrow, what would break first?

APPLIED ASSIGNMENT & DELIVERABLE

YOUR INTEGRATED ACTION PLAN

Combine insights from load mapping, accountability, and capacity planning to define actionable steps.

1. Prioritize actions based on impact and feasibility.

2. Assign a responsible party and define a timeline for each action.

3. Identify required resources and success metrics.

> **IMPLEMENTATION NOTE**
>
> Review this blueprint quarterly or after major organizational change. Use it to guide leadership discussions, workload balancing, and risk mitigation — not as a one-time exercise.

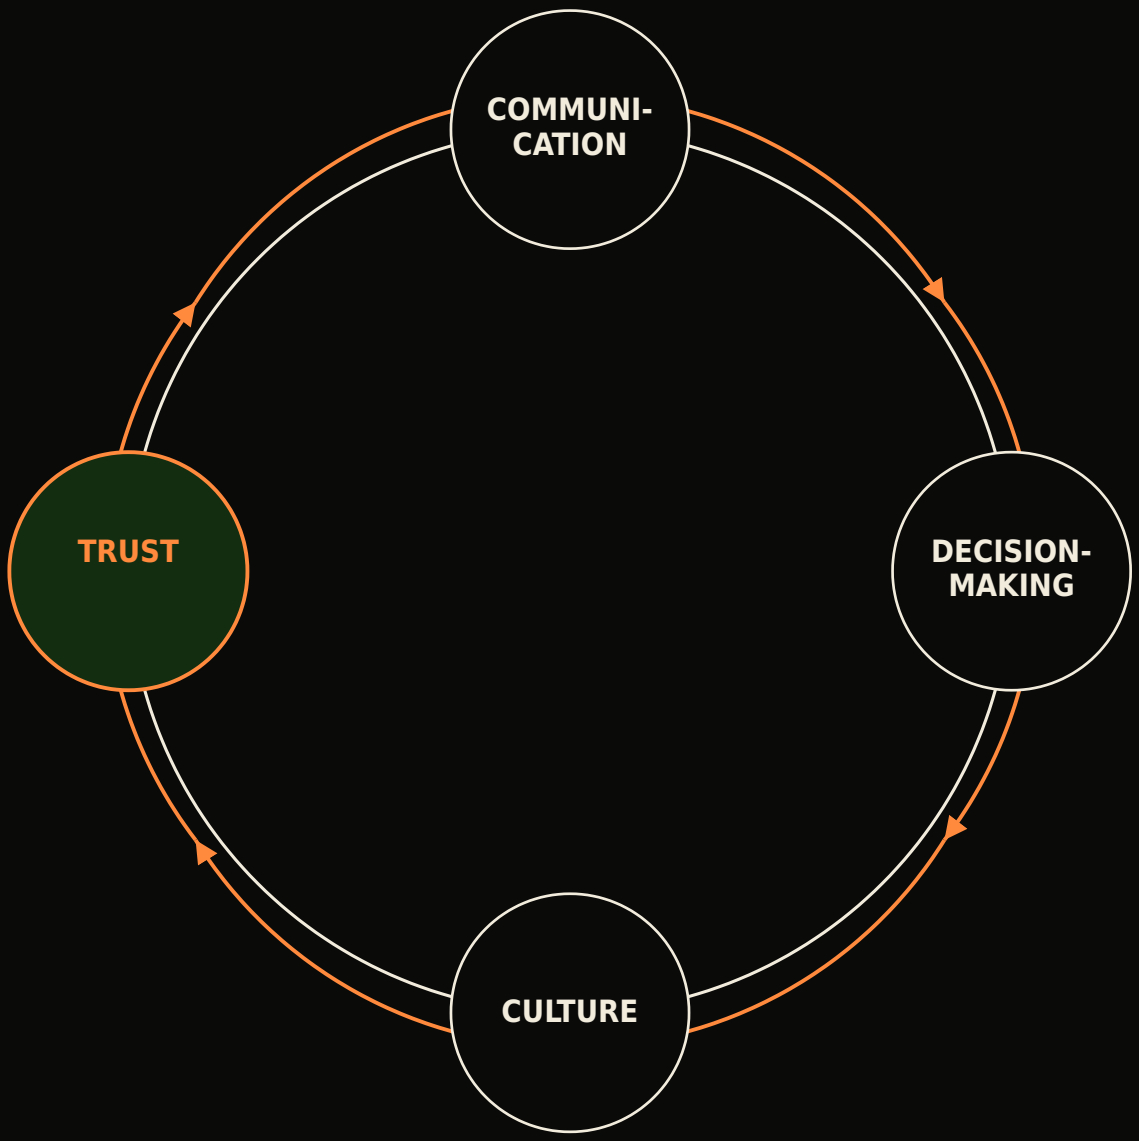

03 / INTERNAL OPERATING SYSTEMS

PHASE THREE

Communication is the nervous system of the organization. Systems that outlive any single leader — including you.

FIG. 03 — THE OPERATING LOOP

SYSTEMS THAT RUN WITHOUT YOU

Consistency builds trust. Trust builds performance. Performance builds scale — and the loop keeps turning long after the Architect leaves the room.

THE INTERNAL OPERATING SYSTEM MANUAL™

This manual documents the structural rules that govern how the organization communicates, makes decisions, resolves conflict, maintains culture, transfers authority, and sustains leadership continuity.

> THE TEST
>
> If leadership changed tomorrow, this manual would allow the organization to continue operating without collapse.

WHAT YOU'LL BUILD IN THIS PHASE

- Executive Intent — identity, mission, operating philosophy
- Communication Infrastructure — cadence, information flow, crisis protocol
- Decision-Making Infrastructure — classification, rights, escalation
- Culture Operating System — anchors, performance, feedback, continuity
- Systems & Governance — KPIs, documentation, scalability, ethics
- A 90-Day IOS Strengthening Plan

SECTION I — EXECUTIVE INTENT

ORGANIZATIONAL IDENTITY STATEMENT

Define the identity your Internal Operating System is built to protect.

1 Mission

2 Vision

3 Strategic Horizon (1–3 years)

4 Core Value Proposition

OPERATING PHILOSOPHY — COMPLETE EACH STATEMENT

"We believe organizations scale when _____."

"We believe leadership fails when _____."

"Our Internal Operating System exists to ensure _____."

SECTION II — COMMUNICATION INFRASTRUCTURE

THE NERVOUS SYSTEM

Define how information actually moves through the organization — not how it's supposed to, how it does.

1 Meeting cadence — Executive Strategy, Departmental Execution, Cross-Functional Alignment, 1:1 Leadership, Company-Wide.

---

2 Information flow — how decisions cascade down, how feedback reaches leadership, where documentation lives.

---

3 Non-negotiables — decision documentation window, "no meeting without agenda," "no initiative without owner."

---

4 Crisis protocol — who communicates first, internal vs. external sequence, response time threshold, single spokesperson.

“

Attention is the rarest and purest form of generosity.

— SIMONE WEIL, PHILOSOPHER

SECTION III — DECISION-MAKING INFRASTRUCTURE

AMBIGUITY DESTROYS VELOCITY

Classify decisions so speed and authority are never guesswork.

1 Tier 1 — Strategic / Irreversible: owner, required data, approval process.

2 Tier 2 — Operational / Reversible: owner, delegation standard, notification requirement.

3 Tier 3 — Autonomous: scope limits, financial thresholds, reporting expectations.

4 Conflict escalation path — direct resolution → manager mediation → executive escalation → governance review. Set a time-to-resolution standard.

SECTION IV — CULTURE OPERATING SYSTEM

CULTURE IS ENGINEERED, NOT ACCIDENTAL

1 Cultural anchors — core beliefs, expected behaviors, unacceptable behaviors.

2 Performance philosophy — what earns promotion, what triggers intervention, how quickly underperformance is addressed.

3 Feedback infrastructure — 1:1 cadence, review structure, 360 frequency, skip-levels.

4 Leadership continuity — if a senior leader exits unexpectedly: interim authority, decision continuity, communication sequence.

SYSTEMS, CAPACITY & GOVERNANCE

Systems reduce dependency on memory and personality.

OPERATIONAL SYSTEMS

- KPI infrastructure per function
- Documentation standards — storage, update frequency, owner, archive protocol
- Initiative control — no launch without alignment, capacity, owner, KPI, and sunset criteria

CAPACITY & LOAD SAFEGUARDS

- Maximum concurrent strategic priorities
- Meeting time ceiling per week
- Delegation threshold and role-overload review cycle

ONBOARDING INTEGRATION

- IOS Manual review
- Decision Rights Matrix walkthrough
- KPI dashboard access & cultural anchor briefing

SCALABILITY & GOVERNANCE

- At 25% growth: systems audit, role clarity, and bandwidth review are triggered — not optional
- Legal compliance, ethical reporting, and audit cadence clearly owned

> RULE
> Scaling without an infrastructure review is prohibited.

SECTION X — APPLIED ASSIGNMENT

90-DAY IOS STRENGTHENING PLAN

Name your top three structural gaps and commit to closing them.

1 Priority 1 — Structural gap, owner, KPI, completion date.

2 Priority 2 — Structural gap, owner, KPI, completion date.

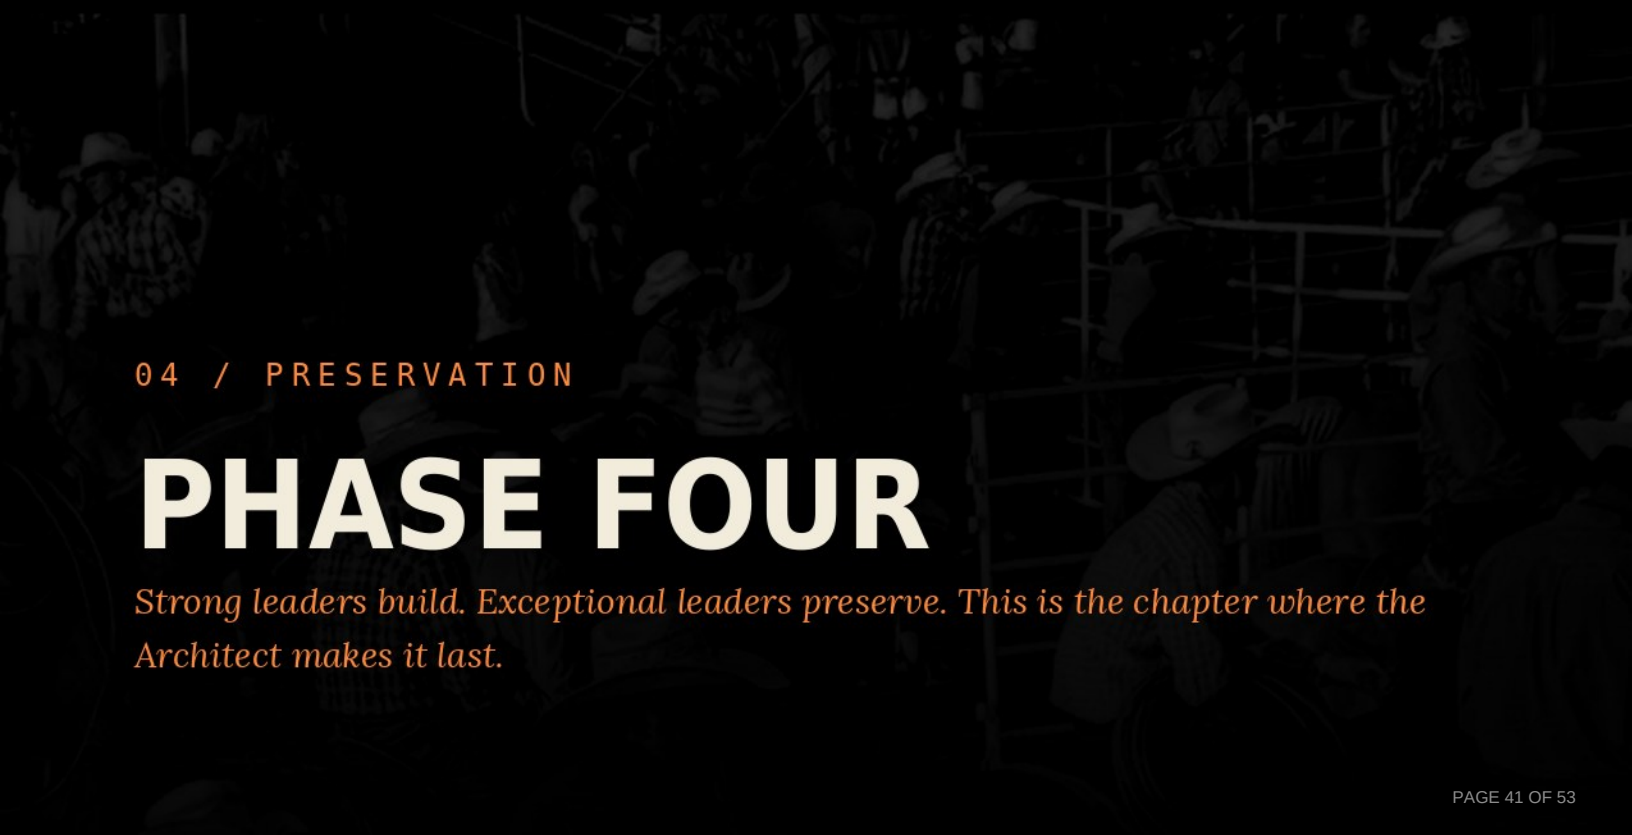

3 Priority 3 — Structural gap, owner, KPI, completion date.

FINAL DECLARATION

"Our Internal Operating System is documented, transferable, and measurable. Leadership does not live in personalities — it lives in infrastructure."

EXECUTIVE SIGNATURE

DATE

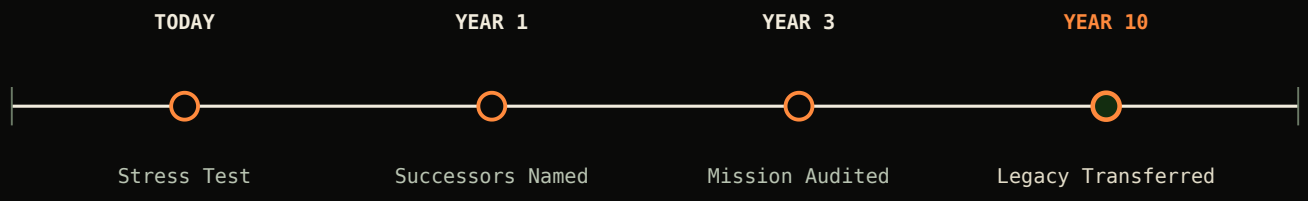

04 / PRESERVATION

PHASE FOUR

Strong leaders build. Exceptional leaders preserve. This is the chapter where the Architect makes it last.

FIG. 04 — THE PRESERVATION LINE

WHAT OUTLASTS THE ARCHITECT

Preservation isn't a single act — it's a line you keep walking, checkpoint by checkpoint, long after the ribbon-cutting.

REINFORCEMENT & SUSTAINABILITY

Phase 4 focuses on sustaining infrastructure over time — ensuring resilience, mission alignment, and ethical growth.

KEY OUTCOMES

- Stress-tested infrastructure
- Leadership continuity and succession planning
- Culture preservation
- Ethical and sustainable operations

> **REMEMBER**
>
> Infrastructure must be maintained to endure. Building it is Phase 1 through 3. Keeping it alive is this phase — for good.

STRESS TEST SIMULATION

1 Simulate high growth, turnover, or operational pressure scenarios.

2 Identify vulnerabilities and risks.

3 Plan mitigation strategies.

REFLECTION

Where is the infrastructure most vulnerable?

Which systems need reinforcement first?

“

You can't cross the sea merely by standing and staring at the water.

— RABINDRANATH TAGORE, SCHOLAR & NOBEL LAUREATE

SUCCESSION PLANNING MATRIX

1 Map critical roles.

2 Identify potential successors.

3 Develop coaching and development plans.

REFLECTION

Are your leaders prepared to maintain infrastructure continuity? How can readiness gaps be addressed?

CORE CONCEPT 03 — PRESERVATION OF MISSION INTEGRITY™

MISSION AUDIT

Review all initiatives and processes against Mission and Vision. Recommend corrective action wherever they've drifted apart.

INITIATIVE	PROCESS	MISALIGNMENT (MISSION)	MISALIGNMENT (VISION)

REFLECTION

Is growth aligned with purpose? Are cultural norms being preserved?

CORE CONCEPT 04 — LEGACY & ETHICAL STEWARDSHIP™

YOUR PRESERVATION BLUEPRINT

1 Create a 12–18 month roadmap for sustaining leadership infrastructure.

2 Include culture reinforcement, succession planning, and stress mitigation strategies.

EXECUTIVE INTEGRATION

Infrastructure is resilient, ethical, and scalable. Leaders can preserve culture, mission, and operational clarity through organizational growth.

CLOSING ACTIVITY — FOR THE NEXT ARCHITECT

WRITE THE LEGACY LETTER

Every structure eventually passes to someone else's care. Write a letter to whoever inherits what you've built — a successor, a partner, a future version of your own leadership. This is the one page in The Blueprint™ with no wrong answer.

What did you build that you're proudest of?

What almost broke, and what held it together?

What do you need them to protect, no matter what changes?

COMPLETION

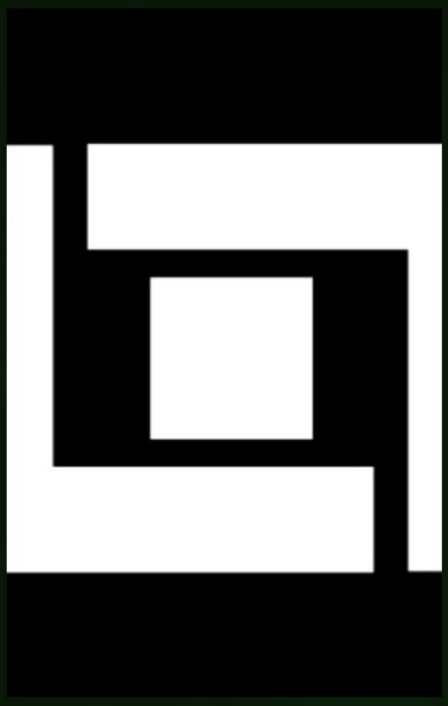

THE STRUCTURE OUTLASTS THE ARCHITECT.

You drew the plans. You set the foundation, framed the systems, and built in the reinforcement to keep it standing without you in the room. That's what legacy actually is — not being remembered, but being *unnecessary* for the thing you built to keep working.

By completing all four phases of The Blueprint™, you now hold:

- A fully articulated Leadership Infrastructure Blueprint
- Repeatable systems for decision-making, culture, and accountability
- Distributed leadership activated across your organization
- Alignment to Mission, Vision, and Guiding Principles™

LEADERSHIP DOES NOT LIVE IN PERSONALITIES.
IT LIVES IN INFRASTRUCTURE.

THE CO.LLAB™

BUILDING LEADERSHIP INFRASTRUCTURE™

GLOSSARY

Glossary Of **Terms.**

Definitions of the terms used across The Co.LLab IP™, in alphabetical order.

Co.LLab IP™ — The proprietary frameworks, tools, models, and materials of The Co.LLab™, owned by Ashley E. Clasby and licensed, never sold, to users.

Foundations (Phase I) — The phase that defines what an organization stands on: vision, values, identity, and strengths.

Infrastructure — The structures, systems, and practices that let an organization perform consistently, independent of any one person.

Infrastructure Planning & Management (Phase II) — The phase that decides what to build and how it connects: priorities, decision rights, and ownership.

Internal Operating Systems (Phase III) — The phase that builds repeatable rhythms, standards, and practices into daily operations.

Leadership Infrastructure™ — Leadership made structural: captured, documented, and embedded so it outlasts the individuals who hold it.

Legacy — What an organization builds that continues after its founders and leaders step away.

License — A limited right to use Co.LLab IP™ for internal purposes. A license grants use, not ownership.

Non-Negotiable — A commitment an organization will not trade away, regardless of financial or competitive pressure.

Omnidirectional Enterprise™ — An ecosystem without hierarchy, in which value moves between companies, people, creators, and communities in every direction.

Preservation (Phase IV) — The phase that ensures knowledge, culture, and intent survive leadership transitions.

Stakeholder — Any person or group the organization serves or depends on: employees, customers, community, partners, and future leaders.

Stewardship — The shared responsibility to protect and advance an organization’s founding intent.

Succession — The planned transfer of roles, authority, and knowledge from one leader to the next.

The IV Phases™ — The four-phase Co.LLab™ model: Foundations, Infrastructure Planning & Management, Internal Operating Systems, and Preservation.

Working Copy — A user’s completed or annotated copy of a Co.LLab IP™ product, made for authorized internal use.

APPENDIX A

The IV Phases™ **Reference Model.**

PHASE	PURPOSE	GUIDING QUESTION
I · Foundations	Define what the organization stands on.	What should never be lost as we grow?
II · Infrastructure Planning & Management	Decide what to build and how it connects.	What depends on a person that should belong to the organization?
III · Internal Operating Systems	Build the systems that make it run.	How do we make what matters part of how we operate?
IV · Preservation	Make it last beyond any one person.	What must exist for what we built to continue?

APPENDIX B
